

ConePro, is a light, portable retracting belt unit that fits onto most types of traffic cones and is more effective at restricting access than cones alone. ConePro 500 features either a 10'3m or 12'3.7m heavy duty nylon belt that won't fray or break even in the toughest conditions. A belt lock prevents accidental belt release. Units are available in orange or yellow and can be supplied with reflective panels and belts for high visibility during darkness.

1 Fit ConePro to the traffic cone

2 Extend the belt to the length required

3 Clip the belt onto the next ConePro

Available in orange, yellow, blue, and green color options.
