

ConePro, is a retracting belt unit that fits onto most types of traffic cones and creates a barrier that is more effective at restricting access than cones alone. The 600 model features belt lengths from 15'/4.6m to 40'/12.2m allowing cones to be spaced further apart saving set up time. Heavy duty nylon construction means the belt won't fray or break even in the toughest conditions. A retraction lock relieves tension on the belt allowing lighter cones to be used and a belt lock prevents accidental belt release.

Retraction Lock:
Relieves tension on the belt allowing lighter cones to be used

Belt Lock:
Prevents accidental belt release

Brake:
For slow, safe belt retraction

► SPECIFICATIONS

Height	11.25"/285mm
Diameter	6"/150mm
Weight	2.2 lbs/1kg
Belt Width	2"/50mm
Belt Length	15'/4.6m, 20'/6.1m, 25'/7.6m, 30'/9.1m, 40'/12.2m
Colors	Orange Orange Reflective Yellow Yellow Reflective Blue Green

Available with reflective panels
