

RollerPro Safety Twin 250 combines the convenience of a roller base with the improved pedestrian control of two belts. The roller base is ideal for the fast, easy setup of barrier lines while the lower belt restricts pedestrians from ducking under the belt and makes this product ADA (Americans with Disabilities Act) compliant. The RollerPro Twin 250 also features a unique two piece post construction which allows the lower belt mechanism to be easily replaced in the field. The Xtra model features a 50% wider belt making a more visible barrier and giving much greater impact to printed logos and messages.

Easy Removal Of Lower Belt Cassette

Slide off the post top

Loosen the cassette retaining screws and slide out the cassette
