

Designed for creating long straight barriers or large cordons the 335 model's 35' belt requires just a quarter the number of barriers needed with the industry standard 7.5' belt. Fewer posts means lower purchase cost, faster set up times and requires less space for transport and storage. SafetyPro 335 is fully outdoors capable and features our rugged cast iron base, fitted with a full circumference floor protector.

Height	Weight	Post Diameter	Base Diameter	Belt Width	Belt Length
40"	31lbs	3"	14"	2"	35'
