

The removable base is designed for permanent barrier layouts but where occasional removal of the stanchions is necessary. The Removable Base is a 2" diameter insert fixed to the bottom of the stanchion that slides into a socket set in the floor. The Standard Floor Socket has a 5" diameter surface flange and is 5" deep. The socket is supplied with a cap for safe closure when the stanchion is removed.

Removable mounting fits a floor socket.

Cap fits into the socket when post is removed.

Model	Height	Weight	Post OD	Base OD	Belt Length
250	40" / 1015mm	5lb / 2.3kg	2.5" / 64mm	5" / 127mm	11' / 3.35m
300	40" / 1015mm	5lb / 2.3kg	3" / 64mm	5" / 127mm	16' / 4.9m
335	40" / 1015mm	8lb / 3.6kg	3" / 64mm	5" / 127mm	30' / 9.1m
