

# SafetyPro Triple 250

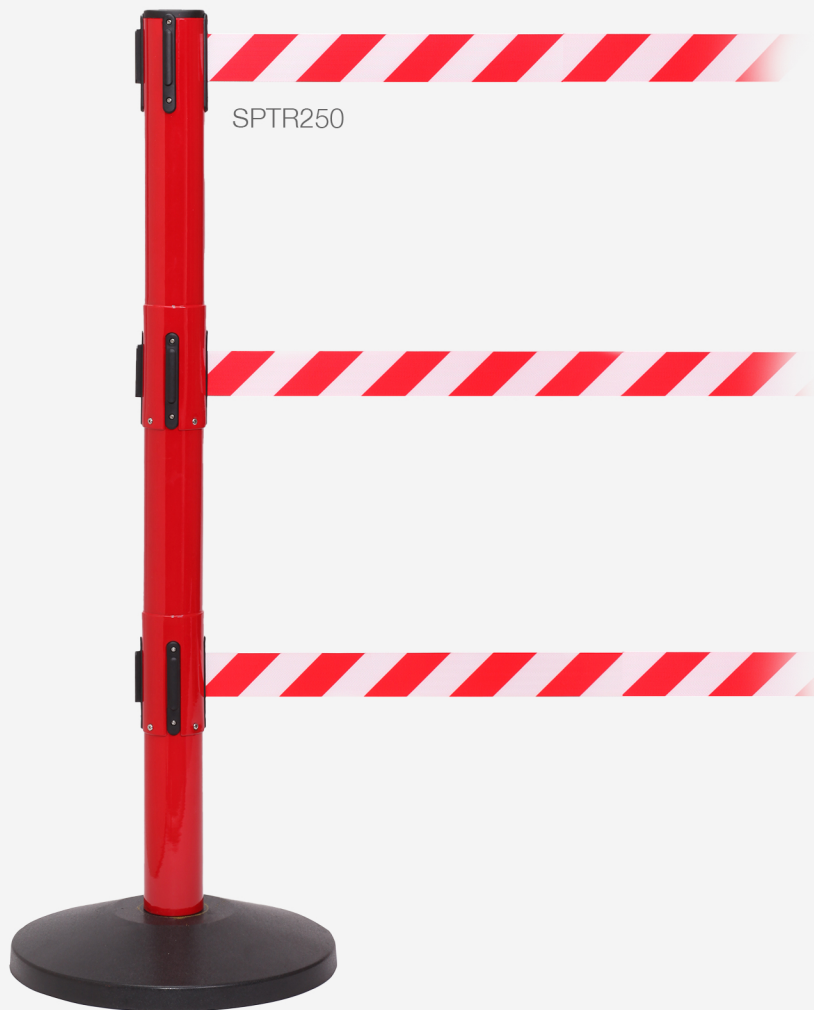

Maximum Perimeter Security

877.977.7657

sales@queuesolutions.com

www.QueueSolutions.com

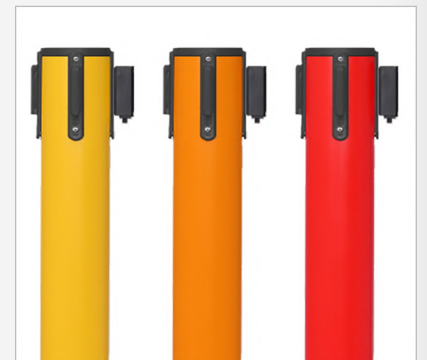

The three belts of the SafetyPro Triple ensure pedestrians cannot duck under or through the belts providing maximum perimeter security for work or manufacturing areas. This post provides a lower cost, more flexible option than using rigid barriers or solid panels. Belt colors and messages can be used in combination to maximize awareness of restricted access. SafetyPro is manufactured from heavy gauge steel with a cast iron base, is designed for outdoor use and is available in three high visibility colors. A range of 30 belt colors and 20 safety messages can be supplied from stock, alternatively belts can be custom printed to your specification.

Easy lower cassette replacement

Weatherized cast iron base

Available in yellow, orange, and red
